

Appl. No. 10/659,244
Amdt. dated August 1, 2005
Reply to Office Actions of May 25, 2005 and July 25, 2005

REMARKS/ARGUMENTS

The claims have been amended to make clear that the ring of the invention is a finger ring for human jewelry, capable of being screwed on and off the finger by means of the internal thread.

Gilbert '044 is a game, set on a base, and could not be capable of use in the manner now claimed.

Obermüller '031 has no internal ridge as now claimed, and there is nothing to suggest such a ridge.

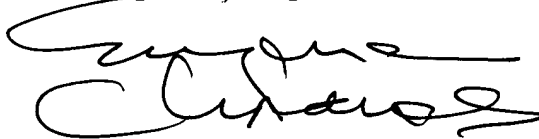

In view of the above amendments and argument, applicant respectfully requests reconsideration of this application, and early allowance of the claims.

A Request for Continued Examination is attached hereto.
